# DEFENSE & SECURITY

## FACING FUTURE THREATS

ILA Berlin is the perfect place for high-ranking military officials, top politicians and CEOs from the defense and security sector as well as professionals from the digitalization industry to share their expertise. While ground-breaking future innovative ideas are being introduced, military aircraft can be observed both on the ground and in the air.

In the **Military Support Centre (MSC)**, the entire spectrum of successful cooperation between armed forces, the Bundeswehr Procurement Agency (BAAINBw) and their industrial partners is showcased – all while ingenious solutions for driving further cooperation are presented.

The international appeal is undeniable, with delegations from well over 100 nations expected to be in attendance. Without a doubt, ILA Berlin represents the innovative and productive capability of the military aviation industry not only across Germany and Europe, but worldwide.

### WHY EXHIBIT AT ILA BERLIN?

- Get information about current and future procurement programs
- Get in contact with different delegations
- Share your views with high-ranking representatives of both the Bundeswehr and international armed forces
- Discuss current challenges and future scenarios for the armed forces
- Experience digitalization: from cyber-resilient weaponry systems to the use of artificial intelligence

# SECURING STATE SOVEREIGNTY

## ILA BERLIN IS THE PLATFORM FOR FORWARD THINKING SOLUTIONS AND TECHNOLOGICAL TRENDS – INCLUDING DEFENSE TOPICS

### ➤ Connectivity

The airborne weapon systems of the future are operating together with swarms of drones (manned-unmanned teaming) and interact with satellites, transport and tanker aircraft in a Combat Cloud. Experience the future of air force!

### ➤ Digitalization & Cybersecurity

Connected Military Training, Digital Logistics and Leadership of Armed Forces, as well as the processing and analysis of huge amount of data are the principal elements of Combat 4.0. See how different assistance systems like Artificial Intelligence, Cybersecurity, Augmented and Virtual Reality contribute to the digital battle-field of the future.

### ➤ Drones

Experience the dynamic development of the drone market! Drone systems minimise risks and have already proven to provide indispensable information to soldiers in action.

### ➤ Cooperation between the Air Force and industry

In order to ensure the operational readiness of flying weapon systems, stronger cooperation with military aerospace industry is crucial. Get to know modern, resource-saving approaches and innovative personnel management models. Alongside digitalization, these modern approaches make an important contribution to the readiness of the armed forces.

Dr. Ursula von der Leyen  
President of the European Commission  
Former Federal Minister of Defense

"ILA Berlin is an excellent showcase for Germany!"

Dirk Hoke  
CEO Airbus Defense & Space

"We share responsibility for a strong Europe that is capable of successfully protecting its values and people from future threats."
